One exhibit of extracted honey is defined as three (3) identical one-pound jars, as specified in rule #17 under the General Rules of the Honey Show. Closures may be of metal or plastic. Tamper-proof seals are strictly prohibited; any exhibits submitted with any tamper-proof seal(s) will be severely penalized. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; uniformity of the jars that comprise the exhibit; cleanliness and clarity of the honey; moisture content (only if needed); and aroma and flavor (for off aromas or flavors). *See Appendix hereafter for notes on correct jars and fill level. The Exhibitor shall place one ID label, as provided by the honey show Secretary, on each of the jars comprising the exhibit. The labels should be affixed at the front, bottom, center of each jar, approximately ½ inch from the bottom of the jar.

Novice Extracted Honey

This category is open only to exhibitors who have never won a First, Second or Third prize in any extracted honey category at any prior honey show. An exhibit consists of one (1) one-pound jar of extracted honey, as specified in rule #17 under the General Rules of the Honey Show. Closures may be of metal or plastic. Tamper-proof seals are strictly prohibited; any exhibits submitted with any tamper-proof seal(s) will be severely penalized. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; uniformity of the jars that comprise the exhibit; cleanliness and clarity of the honey; moisture content (only if needed); and aroma and flavor (for off aromas or flavors). *See Appendix hereafter for notes on correct jars and fill level. The Exhibitor shall place one ID label, as provided by the honey show Secretary, on the exhibit. The label should be affixed at the front, bottom, center of the jar, approximately ½ inch from the bottom of the jar.

Chunk Comb Honey

One entry of chunk comb honey is three (3) identical one-pound jars. Chunk comb honey must be displayed in straight sided, uncolored, glass, wide mouth jars. The glass should not be embossed. Such jars are available from many commercial beekeeping suppliers. Only one chunk of comb should be in each jar for competition. The chunk of comb must be in one piece, of uniform thickness, and with a straight mid rib. Virgin comb with this year's wax is preferred. All wax foundation should be unwired, thin surplus. The cuts should be clean and uniform. The chunk comb should be cut and sized to appropriately fit the container. The honey should fill the

rest of the jar to the correct fill line. The comb should be oriented in the container as found naturally in the hive. Comb with watery cappings should be avoided. The comb should extend the length of the jar. The chunk of comb should account for at least fifty percent (50%) of the internal volume of the jar. Judges evaluate entries on the following: confirmation with the criteria set forth herein; cleanliness of the jar and lid; correct fill level; uniformity of the jars that comprise the entry; cleanliness and clarity of the honey; absence of pollen, brood, uncapped cells, “wet” or “watery” cappings, or travel stains on the cappings; freedom from granulation; absence of floating wax debris in, or on the surface of, the honey; moisture content (only if needed); and aroma and flavor (for off aromas or flavors). The chunk of comb must be in one piece, with a straight mid rib and of uniform thickness. Virgin comb with this year’s wax is preferred. All wax foundation must be unwired, thin surplus. The cuts should be clean and uniform. There should be no leaking of honey from the comb into the box. Judges evaluate entries on the following: confirmation with the criteria set forth herein; uniformity of the items that comprise the entry; uniformity of appearance and color (including the honey in the comb); cleanliness of the container; completeness of cappings; cleanliness and clarity of the honey; absence of pollen, brood, uncapped cells, “wet” or “watery” cappings, or travel stains on the cappings; freedom from granulation, pollen, and brood; moisture content (only if needed); and aroma and flavor (for off aromas or flavors). Creamed or Soft Set honey is honey that has been subjected to a manual or mechanical process to assist and control the otherwise natural process of granulation. An entry of creamed honey is three (3) identical wide-mouth jars, no less than eight ounces (8oz.), nor more than sixteen ounces (16oz.) in net weight. Creamed honey must be displayed in identical, clear, straight-sided, glass jars with one-piece lids. The total weight of the exhibit may be used as a tiebreaker. The Exhibitor shall place one ID label, as provided by the honey show Secretary, on the top bar, middle of the frame and on the right-hand corner of the window uppermost of the display case containing the exhibit.

Black Jar

An entry consists of not less than two ounces, nor more than four ounces, of pure, unadulterated honey. BEVERAGES MADE WITH HONEY

The Exhibitor should also note on the white card if they have submitted a second bottle for chilled tasting. The Exhibitor shall place one ID label, as provided by the honey show Secretary, on the front, bottom, center of the bottle, approximately ½ inch from the bottom of the bottle. Additionally, the Exhibitor shall place one ID label, as provided by the honey show Secretary, on the white card accompanying the exhibit. *In the event an Exhibitor elects to submit a second bottle to be chilled for tasting, the Show Secretary will affix an additional identifying label around the neck of the bottle to be chilled.

Appendix

Notes on Correct Fill Level:

The correct fill level on honey entries is at the top of the fill ring of the jar, without going over. The fill ring is the raised ridge, or ring of glass, immediately above the shoulder of the jar and below the threads. It can be distinguished from the threads in two ways: a) the fill ring forms a complete circle, without ends; and b) the fill ring will be completely parallel with the bottom and top of the jar. Liquid honey in a circular shape forms a concave surface sometimes referred to as a meniscus. For the purpose of filling jars, the edge of the meniscus should clearly be at the top of the fill ring, without going over.
